

Design a travel rental website like **Airbnb** using HTML and CSS. Your layout should include:

- A top navigation bar with logo and links (Home, Experience, Services, Help Centre)
- A hero section with a background image and search bar
- Featured listings (Images, titles, and prices)
- When a listing is clicked it has to show the details of it.
- Responsive Layout (Adapts to desktop and mobile)
- A footer with basic links
